APCS – Mr. Ascione

Array Utility Project

Objectives: To practice working with Arrays. To use for loops to traverse an array, search an array and perform various operations on an array.

Spec: In this project you will be given the template for an ArrayUtility file. You will also be given a simple client to use for testing purposes. Open ArrayUtility.java and take a look at the methods and the comments for each method. Your task in this project is to implement each of the methods shown.

Files Needed: ArrayUtility.java and ArrayRunner.java
